

CARE & MAINTENANCE GUIDE

Product Care Instructions

Item Code	604279
Item Name	Treewood Table & Bench Set

This natural range of furniture has been coated with timber stain and oil.

To maintain the appearance, furniture should be oiled using natural oils such as raw linseed oil or beeswax on a regular basis. This will depend on where the furniture is located and the weather; however, on average, we recommend oiling every 6 months.

This timber is naturally affected by the elements over time. Temperature and humidity affect the natural expansion and contraction of the timber. To help extend the life of the product, avoid exposing it to excessive heat or environments with very high or very low humidity. For best results, we recommend keeping the furniture under cover and out of direct sunlight and rain.

To clean, remove dust with a dry, lint-free, soft cloth, then wipe with a lightly damp cloth.
